Billing Policies

Baker Pediatrics follows billing guidelines, set by the federal government, for the care we provide. We are bound by our agreements with insurance companies to follow these rules precisely. Each provider is trained in the rules and carefully considers billings prior to submission.

If your child is seen for a well child check-up, and there is significant additional medical diagnosis such as an ear infection, asthma, developmental delay, ADHD, eczema, sleep problems, (ex: preexisting problems, acne, allergies, rashes, warts, etc.) then we will bill for both the well care and for the care of the additional problem. **The care is provided on the same day, but is considered distinct by the insurance companies. Due to this, you may be charged a co-pay or deductible on the visit, even if you are not required to pay a co-pay for the well child check-up.**

Also, if your child has to return to the office at a later date for an immunization, either because they are unwell at the time of their well child check-up, or because you defer getting immunizations on that day for another reason, they will be seen for the follow-up visit and the visit will incur a physician charge and may require co-pay or deductible.

If you have questions about your bill, we are always happy to answer them.

We are dedicated to providing the best possible care for you and your family.
